

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

TO THE REVISED EDITION.

AMONG the smaller dictionaries of the English and German languages Cassell's German Dictionary, compiled by Miss E. Weir, has for many years been held in well-deserved esteem by English and American students of German, and even been used by several of the latest German dictionary writers. When the publishers asked me to revise the book, originally published in 1888, I undertook the laborious task in the hope of being able to correct a number of actual mistakes, and to add many important words and phrases that had either been overlooked or had recently come into existence. But, especially, I wished to make several general improvements which would materially enhance its practical usefulness, and make it, if possible, the best English-German dictionary in one volume at a moderate price, a book comparable, in its more limited sphere, to the new Grieb-Schröer, Flügel-Schmidt-Tanger, and the small Muret. To the accomplishment of this task nearly all my leisure hours during the last eight years have been devoted, but I am only too conscious that I have not been able fully to realize the aim which I had set before me. I shall at all times be sincerely grateful for notifications of mistakes or important omissions — the only way in which those who use a book of this kind can to some extent repay the compiler for the onerous work he has performed in their interest.

Only the principal accent of the German words has been given, and this, it is hoped, will be found helpful. As the book will in all probability be mainly used by English-speaking students — although not addressed to them exclusively — it did not seem to be equally important to indicate the accentuation of the English words. For the same reason the vocabulary of the German-English part is somewhat fuller than that of the English-German portion. In the former, besides the stock of ordinary words that are bound to appear in both parts, many German dialectal terms (e. g. *Deern, man, Marjell, Fluh*, etc.) are introduced, as well as the most common German slang expressions — such as occur in every modern German book or newspaper, and are frequently heard in educated families — while there was no necessity to give them in the English-German part. All reasonable assistance for writing German composition, up to an advanced stage, has, however, been given, and it will be found that the idioms of both languages have been treated with particular fullness for a book of this size.

In compiling this new edition the best modern dictionaries of English and German have been consulted, above all the admirable Muret-Sanders, in the compilation of which I myself had for some time a modest share. The nature

of this monumental work precludes all thoughts of comparison or rivalry. Also the excellent works of Flügel, Flügel-Schmidt-Tanger, Grieb-Schröer, the small Muret (in 2 vols.), Heyne, Paul, Kluge, Heintze, Saalfeld; the New English Dictionary, Cassell, Webster's International, the Century, the Standard, Annandale, Chambers, Skeat, and many others, were frequently consulted, and rarely without profit. A comparison of these valuable works with the books enumerated by Miss Weir as her chief authorities shows at a glance the great strides made in the field of English and German lexicography since the publication of the first edition in 1888.

The chief points in which the present edition differs from the original are the following:—

Not only have numerous mistakes and misprints been corrected, and many thousands of new words and phrases been added, but a large number of the old renderings have been corrected and re-arranged. Words etymologically connected have, as a rule, been grouped under the same heading, while in many cases homonyms of different origin, which had been confused in the former edition, have now for the first time been separated. The forms of all the strong and irregular verbs, besides appearing in the Indexes, have been entered in their alphabetical place in the main part of the Dictionary.

In the German-English part the German accentuation has been indicated. In the English-German part, and in the lists of the German strong and irregular verbs, the latest official spelling of 1902 (as adopted by Germany, Austria, and Switzerland) is given. This spelling, which will probably be generally adopted in the future (e. g. *Efeu, Tür, gibt, instande sein*), has hitherto not appeared in any other English-German dictionary. Wherever the spelling of German words in Part I. and Part II. disagrees, the spelling of Part II. should be followed. The spelling of Part I., however, is the one which until now is found in nearly every ordinary German book.

A great improvement on the old edition is the insertion, in brackets, of the case required in particular phrases by German prepositions that take more than one case. The want of such information is the frequent cause of mistakes in German composition, and the way to avoid these common errors is not always readily discovered even in larger dictionaries. The prepositions required in connection with certain nouns have as a rule been added (e. g. *Ehrfurcht (vor)*, *Hoffnung (auf)*, *Lust (zu)*, *Abneigung (gegen)*, etc.) The cases have been added in all such reflexive verbs as do not take the accusative (e. g. *sich denken, sich einbilden, sich verschaffen*). The somewhat misleading *etwas* and *jemand* have been replaced by the terms *eine S., einer S. and einen, einem*. In the English-German part great care has been bestowed upon the rendering of foreign terms by their German equivalents. In conformity with the moderate principles of the "Allgemeiner Deutscher Sprachverein," German renderings are generally given alone or in the first place, where in the previous edition the English word had merely been rendered by a German homonym.

Among the new words and phrases inserted will be found many thousands of idiomatic phrases, well-known proverbs that have no literal equivalent in the other language, and familiar quotations; many ordinary dialectal and colloquial expressions, and a number of German slang terms in common use that

often prove puzzling to English students. There will also be found the chief new cycling and motoring terms, ordinary military, postal, railway, tennis, historical, geographical, phonetic and linguistic expressions, newspaper terms and advertisements, the chief technical terms of commerce, education, literature, and art. Space was gained for the very numerous additions by the omission of some lengthy translations of unimportant Biblical passages, some little used and obsolete words, vulgarisms and rare scientific and technical terms. In many cases space was saved by the suppression of compounds, the formation of which presented no difficulty and the component parts of which were given under their separate headings, e. g. "butter-dish" *Butterschale*, "watermelon" *Wassermelone*, etc. On the other hand, "butterfly" *Schmetterling*, "waterlily" *Wasserrose*, had, of course, to be given, as well as words in which one part of the compound is inflected in German, such as "sunflower" *Sonnenblume*, "woman-hater" *Frauenhasser*, *Weiberfeind*, "goose-quill" *Gänsefeder*, etc. Thus, while compounds such as *Apfelbaum*, *Buchmacher*, *Öllampe*, or "breadfruit tree," "house door," "tiger-cat," and many others could safely be omitted, words such as *Sündflut*, *Maultier*, *Heerstrasse*, or "lady-bird," "titmouse," "wormwood," and others are given. Accurate information as to the best German pronunciation is given in the books by Viëtor, Siebs, Johansson, and others (see p. ix.) which are cheap and easily accessible. The appendix to the first edition, containing a synopsis of the changes introduced into German orthography in 1880, has been omitted, as it is now quite out of date. Students should consult the little official Prussian spelling-book, and the handy and cheap works by Duden and Sarrazin, the full titles of which are given below. For fuller information on all these works, and for a synopsis of the chief difficulties of German pronunciation, students may refer to my book on the "Teaching of Modern Foreign Languages" (Cambridge: University Press. Third edition, 1906). In dividing up words the combination *st* is now considered inseparable, hence *ne'stein*, *trö'sten*, etc. In case of doubt concerning the best spelling of certain English words I have often been guided by the "Rules for Compositors and Readers," at the University Press, Oxford, by H. Hart, London and Oxford, 1907.

The very full indexes of names (including the chief colloquial forms of proper names) and abbreviations, and the lists of strong and irregular verbs in both parts, are for the most part new, and will, it is hoped, greatly add to the usefulness of the book. The insertion and explanation of some important German "kenningar," such as *der grosse Schweiger*, *der rote Prinz*, *die rote Erde*, *der eiserne Kanzler*, *der alte Fritz*, or terms such as *Erbkönig*, *Rübezahl*, *Königsleutnant*, *Schuldbürger*, *Buxtehude*, etc., will probably be welcome additions. In this way, although in the briefest possible manner, some common German and English *realia* could be explained.

In conclusion, there remains for me the pleasant duty to render my heartiest thanks to many old pupils and kind friends who, by sending me contributions, or in some other way, have assisted me in my work. Among my friends and colleagues my thanks are due to Professors Fiedler, Herford, Napier, Marshall Ward, and to Messrs. Chas. Elsdon, G. Morier-Hinde, Yule Oldham, S. Ruhemann, O. Siepmann, Francis Storr, Josiah Walker. Of former pupils I gratefully mention the names of the Misses G. M. Parry, H. Sollas, and J.

Burne, and of Messrs. H. Brown, E. C. Quiggin, Thomas Rea, and F. E. Sandbach. I am particularly indebted to my friends and former pupils Mr. E. Bullough, and, above all, to Miss Minna Steele Smith, Head Lecturer in Modern Languages at Newnham College, who have with the greatest care assisted me in the revision of part of the proofs. Much that is good in the book is due to the assistance received from these various kind helpers, while I must alone be responsible for its shortcomings. My thanks are also due to the great pains bestowed on its production by the printers of Cambridge, U. S. A., and the care and resourcefulness of their able press reader. I now dismiss my book from the quiet study into the bustling world and its manifold claims on it with the parting words of the good old Sir Richard Ros :

"Goo, litle book, God sende the good passage . . .
And specially lete this be thi prayere
Vnto hem all that the wil rede or here,
Wher thou art wrong, after ther helpe to calle,
The to correcte in eny parte or alle."

A large number of minor corrections and improvements have been made in this reprint, and all the misprints noticed have been corrected. I shall be grateful to any users of this book who will kindly either point out to me actual mistakes, or call my attention to important omissions (for a book of this size) in order to enable me to introduce further improvements into subsequent editions. My thanks are due to Professor Walter Rippmann, M. A., Mr. Francis E. Sandbach, M. A., Ph. D., Mr. E. C. Quiggin, M. A., Ph. D., Mr. Thomas Rea, M. A., Mr. G. Morier-Hinde, M. A., Mr. A. Henry, M. A., Mr. E. Barry, M. A., and Mr. G. W. Bullen, for kindly sending me corrections and suggestions.

EXPLANATION OF METHOD.

Grouping of words into articles. WORDS etymologically related and having an initial syllable or syllables in common are grouped under this initial syllable or syllables. The completion of each word (the suffixes and second components), being printed in full-faced type, readily catches the eye, thus obviating any difficulty which the breaking up of the words might otherwise present. Words formed by terminations (derivative words) come first in each group in alphabetical order, the compounds following in the same order, but separated from them by the abbreviation *Comp.* (for Compound).¹ No attempt has been made to distinguish between *primary* derivatives (such as *Rust*, *Stume*, *Stimme*) and *secondary* (as *tristfar*, *Späker*, *fristlik*), such distinctions being deemed beyond the province of a work like the present.

Use of Brackets. When a prefix, suffix, or component of a word is enclosed in brackets it is to be understood as signifying that the unbracketed word is a synonym by itself, and when taken with the bracketed word or syllable forms another synonym, which may be used in the same sense as that in which the unbracketed word is used. thus *(Stut-)Aber* signifies that *Aber* and *Stutaber* are both equivalents in a certain sense of the English word 'vein'; in the same way, *(ein)tauchen*, to dip; *(er)läßtlich*, venial; electric(al), *elektrisch*; crook(ed)-backed, *bucklig*, etc., etc. But if a word or phrase enclosed in brackets in one language be followed by a word or phrase enclosed in brackets in the other language, the contents of the one bracket are to be understood as translating the contents of the other: for example — to do good (evil), *Gutes (Böses) tun* — where *Böses* is the translation of the bracketed 'evil,' and the phrase *Böses tun* of the phrase 'to do evil.' When a German word or words enclosed in brackets is followed by no bracketed word or words in English, the contents of the bracket are for the purpose of showing the case required by the German verb it accompanies, or for some other grammatical purpose; thus, when 'to court' is to be rendered by *(einer Person) den Hof machen*, *(einer Person)* is inserted for the purpose of informing the student that, although the English verb governs the accusative case, the German requires the dative; in the same way, 'to court' is further defined as *sich (um eine S.) bewerben*, in order to exhibit the fact that in this sense of 'court' the German equivalent is followed by the accusative with *um*. In the German-English division (*einem etwas*) is employed as a short way of saying that the verb to which it is joined governs the dative of the person and the accusative of the thing.

Punctuation. When several synonyms are given, all answering to one sense of a word, they are separated by commas, whilst those representing different senses are separated by semicolons; thus — *fall*, decay, ruin, downfall; case (*Gram.*) — 'decay,' 'ruin,' 'downfall,' being all synonyms of *fall* in one sense, are only separated from one another by commas, but they are separated from 'case,' which represents a wholly different sense, by a semicolon. A phrase, on the other hand, even when exhibited in wholly different senses, has the different renderings divided only by commas; before each new sense, however, in the English-German part, an explanatory word or phrase is inserted in parentheses — as — to break down, *im Abnehmen sein* (as a p.'s health), *durchfallen* (at an examination), *umwerfen* (as a carriage) — or — to come round (recover), *sich erholen*, (change one's opinion) *schwanken*, *sich bedenken*, *sich anders befinden*, (return, as an anniversary) *wiederkehren*, (return, as a term) *fällig werden*, (change, as the wind) *sich drehen*, etc.

¹ English words given under *Comp.* are not always written as compounds.

English Synonyms or Explanations of German words. In Part II., or the English-German division of the work, every new sense in which a word is taken is either preceded by an English synonym¹ in Roman type in parentheses, as — to doom (sentence) *verurtheilen*; (destine) *bestimmen* — or followed by some explanatory word or phrase in italics in parentheses, as — to do, *erweilen* (*kindness*) — or — to drive, *geifern* (*as infants*) —. In place of a synonym, a word is occasionally preceded by an explanatory clause in italics, as — to drink (*of beasts*) *saufen* — which denotes that 'drink,' when expressing the action of a beast, is translated by *saufen* and not by *trinken*, which is the word employed in the case of human beings.²

Gender of German Nouns shown by accompanying Article or Adjective. The gender of German substantives in this part, too, is shown by the accompanying article *der, die, das*; but when an adjective is given with the substantive the article is usually omitted and the gender shown by the termination of the adjective, as — dry measure, *trockenes Maß*; dry cough, *trockener Husten*.

The term 'Particle.' The term *part.* (for particle) has been employed throughout to denote a class of words, so numerous in the German language, which, while possessing a certain force, have no precise syntactical relation to the other words in a sentence. This is the only particular in which the ordinary terminology of English grammarians has been departed from.

Similarly spelt words are numbered. Words differing in meaning and origin, but spelt alike, are numbered, so that no difficulty can arise owing to their separation for etymological reasons under different heads.

For an explanation of abbreviations, see Abbreviations (p. xiv.).

¹ These words are, of course, only approximately synonymous.

² It is, of course, to be understood that where a synonym of, say, an adjective is explained, the substantive, etc., corresponding to this adjective, and included in the same article, is not in general separately explained: as — *Pleasant, adj., freundlich* (*as a room*); (*lively*) *munter, etc.* — *ness, s., die Freundlichkeit; die Munterkeit.*

Ge-, an unaccented prefix, is used especially to form: (1) Collective nouns derived from substantives, nearly all of the neuter gender, the root vowel of the substantives being, if possible, modified; e.g. *Ge'stein*, *Ge'st(e)*, *Ge'mäßer*, *Ge'wöl*, *Ge'büsch*, *Ge'sträuch*. (2) Verbal nouns denoting repetition or continuation of the action of the verb, all of the neuter gender and without plural; e.g. *Ge'balge*, *Ge'heul*, *Ge'rebe*, *Ge'minsel*, *Ge'stülpe*, *Ge'stühne*. (3) Past participles; e.g. *ge'schüttet*, (esteemed) fr. *schütten*, *ge'achtet*, (outlawed) fr. *achten*, *ge'boren* (born) fr. *gebären*. In words beginning with a vowel the global stop should be made after the *ge-*. In older German a number of past participles were formed without the prefix *ge-*, and some of these forms survive in poetry or popular and dialectic phrases: *kommen*, *gauen*, *bissen*. See also *worben*. For any words not given in the following lists see the simple words.
